

COVID CHECKLIST

As participants arrive to the project site, a Project Coordinator or COVID Prevention Coordinator should administer the following health assessment checklist to remind volunteers of the potential COVID-19 symptoms and factors that may require the volunteer to go home.

- 1.** Have you been diagnosed with or tested positive for COVID-19 within the last 10 days?
- 2.** In the last 2 weeks, did you care for or have close contact with someone diagnosed with COVID-19?
- 3.** In the past 24 hours, have you had a new onset of any of the following symptoms of unknown source? (new or worsening cough; shortness of breath or difficulty breathing; new loss of taste or smell)
- 4.** In the past 24 hours, have you had a new onset of any of the following symptoms of unknown source? (fever, chills, fatigue, muscle or body aches, headache, sore throat, congestion or runny nose, nausea or vomiting, diarrhea)
- 5.** Have you travelled out of state within the last two weeks?
- 6.** If participants answer “yes” to any of the first four questions, they should be sent home immediately; if they answer “yes” to the 5th question, they should be informed that, while they can participate in the event, they should make sure to maintain 6 feet of distance from all participants at all times during the duration of the event
